

You're not running your compliance on your MIS. You're running it on a *spreadsheet*, or paper, **that hasn't been updated since 2018.**

JCQ, H&S, and buildings, all in one place. Built for the person carrying it all.

THE COST OF GETTING IT WRONG

£20,000+

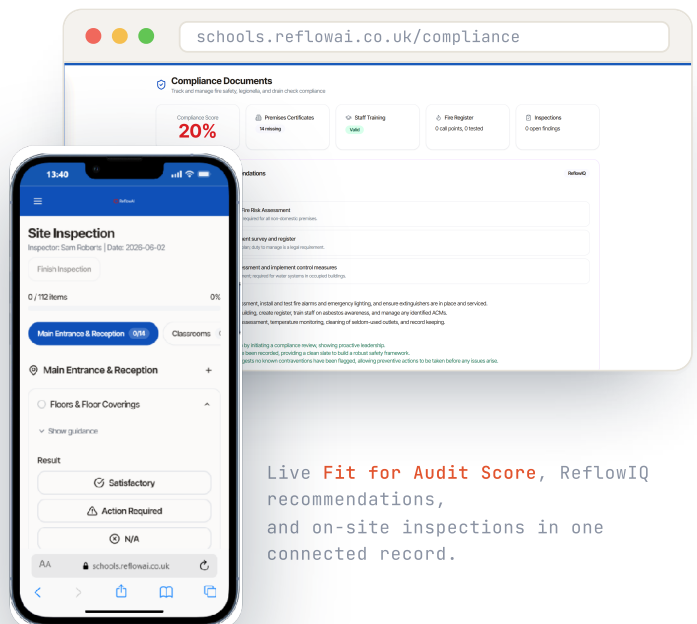

A single HSE prosecution. Interventions alone average £875 a visit. Lose JCQ centre status, and your students sit their exams at another school.

Fit for Audit is £1,200 a year. Payback in 1-2 months.

You've got JCQ regulations that update every September and a part-time exams officer who finds out about the changes when they Google it. You've got H&S checks that are supposed to happen monthly, a fire safety log in a folder somewhere, legionella records that might be current, and a buildings compliance file in a drawer in the site manager's office.

When an auditor comes, or JCQ, or HSE, someone spends two weeks pulling it all together into something that looks like a system. **It isn't. It's a reconstruction.** And everyone in the room knows it.

This isn't on you. Every piece of software schools get sold is built for something else and bent to fit, takes months to implement, or needs a training course just to log in. So you do what any rational person does. You use what works. Which is usually a spreadsheet.

Live **Fit for Audit Score**, ReflowIQ recommendations, and on-site inspections in one connected record.

Fit for Audit is different. Here's what it actually does.

- ✓ JCQ compliance managed year-round, not assembled in a panic before the inspection window.
- ✓ **Live Fit for Audit Score:** one number that tells you where you stand, all the time.
- ✓ **Escalation trails:** issues raised, tracked, and closed with a record.
- ✓ H&S and buildings records captured as they happen, not reconstructed before a visit.
- ✓ **Automatic regulatory updates:** frameworks change, your tasks change with them.
- ✓ **One-click evidence pack:** ready before anyone asks for it.

Not your MIS. Not another spreadsheet. Not a system that needs a training day.

Up and running in **3 days**. No procurement hoops. Schools sign under delegated budget authority.
